

Milly Lai, 柯翠蓮

- 生誕：
 - 1950-09-25 ??:?? - 2024-03-09 14:09, 享年 74歳
- 死因：
 - 2023-07-08 膵臓癌、Stage(ステージ) IV 発見, 237日の健闘した後
- 配偶：
 - 頼宗佑、1948-10-15 ??:?? -
- 結婚： - 1973-10-22, 死の当時 金婚+One
- 子女：
 - 頼修慧 (Frances Lai, 長女：1974-09-28)

- 賴修皓 (Betty Lai, 次女: 1979-11-20 14:92??), 適 Thomas Henry
- 賴美旭 (Kelly Lai, 三女: 1990-10-22 16:00)

- 子孫：
 - Mark and Vivian

2023-07-10 17:30, I was with Lawrence on my way back to Taichung from a sail trip over 大鵬湾の外海, and I got a call from Milly. I could not hear her clearly and did not fully comprehend what she said. Lawrence heard me speaking to Milly and alerted me that my wife said she was "diagnosed by 中国医葯学院 with Pancreas tumor(胰臟腫瘍)". And suddenly, I realized how serious the problem was! And here goes our 237 days fighting with this notorious disease.

We immediately checked into 台大医院 from 2023-07-12 to 2023-07-22 for a more comprehensive checkup. It was reconfirmed that 胰臟癌 was at stage IV, and an operation was out of the question.

The immediate therapy available was 化療法 (chemotherapy) 。 The first shot was injected on 2023-08-07. We also chose CIK 細胞療法 and the preparation were from 2023-07-23 to 2023-08-04.

From 2023-09-24 to 2023-12-05, we also had 重粒子治療法 at 臺北榮總。 The whole 重粒子治療 was done and considered a success for 切除(pulverizing) of the 胰臟. Everybody, including Milly, relaxed a little bit, and all my daughters had already used up their vacation days and started to head back to their work place.

Milly had the first shot of CIK 細胞療法 on 2024-12-14. Milly could not stand 化療法 any more, and I was hoping that after 重粒子治療, we could think that the 胰臟 was successfully cut off, and CIK could be an additional solution. So I accepted Milly's decision to stop 化療 injection and only take oral medications.

On 2024-01-17, Milly's CA19-9 reported at 3372.1, which meant that the 膀胱癌 was still very active, and we lost control of it. Please note that CA19-9 was at 2709 on 2023-07-24 (when initially diagnosed as a 膀胱癌 patient), was 436 on 2023-09-28 (during 化療), and 350 on 2023-12-12 (after 重粒子 and before CIK).

On 2023-01-22, the 化療主治医 transfered us to 家庭医's care. Even though he did not say anything, I believe this is the start of Hospice Care.

In her final days from 2024-02-01 to 2023-03-09 at the hospice, Milly received morphine and some other tranquilizers to soothe her pain. She cycled through various stages of drowsiness, agitation, and sleep. From what I could tell, most of the time she was comfortable and relaxed. And finally on 2024-03-09 at 14:09, she left us after she knew Kelly was back again by her bedside. She chose this time to leave us behind.

最後、秋山ちえ子さんはそう言っていました、「運命は人間には計り知れない。寿命は生まれた時から決まっていると思った」 (Fate is immeasurable. Lifespan was fixed from the moment we were born.)

Thanks everybody! May Milly, her parents, my parents, and all our past relatives be happily together in so called Heaven!!

Your beloved Husband

頼宗佑 with tears
