

The image shows an electrical control panel with the following components and wiring:

- Central Circuit Breaker:** A white 190A circuit breaker with a green handle and a blue label. It is mounted on a light-colored panel. Above it are three thick black power cables.
- Terminal Blocks:** Two large black terminal blocks are positioned on either side of the circuit breaker. They have multiple screw terminals for wire connections. A red wire and a white wire are connected to the right-hand terminal block.
- Wiring:** Several green wires are connected to a terminal block at the bottom of the panel. A red wire and a white wire are also connected to the right-hand terminal block.
- Panel Features:** The panel has several circular holes and mounting points. The text "新品責任書" (New Product Responsibility Book) and a star logo are visible on the panel.
